GOLDSMITH

⁽¹⁾ This translation has no legal status.

3. ACQUIRED KNOWLEDGE, SKILLS AND PROFESSIONAL COMPETENCES

The holder of the certificate is qualified to:

- perform various manual and mechanical processes for the cutting, shaping and joining of precious metals and non-metallic materials in the goldsmithing field;
- fabricate and design individual types of jewellery using various technological processes and processing techniques;
- recognise precious and decorative stones used in jewellery, as well as imitations and fakes;
- test precious and decorative stones, classify and handle them;
- measure, mark, test and control goldsmithing products and observe compliance requirements;
- plan and fabricate items of jewellery or complete jewellery pieces, as well as finish, rework or repair them;
- prepare creative and original design solutions for jewellery and use basic engraving techniques;
- realise their own design ideas and fabricate one-off products made of precious metals and jewellery;
- calculate the required substances of precious metals alloys and select the process depending on the form and complexity of the product;
- prepare the cast for jewellery, fabricate settings and set decorative stones;
- alloy, melt, anneal and temper precious metals and their alloys;
- design jewellery with gems and apply gem working techniques;
- use technical and technological documentation, technical regulations and standards, and technical drawings and instructions of the manufacturer;
- provide consulting for clients relating to repairs, maintenance and care, and the wearing of jewellery and gems;
- implement and provide for the measures for occupational health and safety, environmental protection, fire safety and accident prevention;
- have a positive attitude towards measures to reduce pollution and improve protection of the environment;
- apply judgement on the rational use of energy, use of energy sources and waste management;
- cooperate in a group and apply business communication with co-workers, experts and clients using basic professional terminology;
- use modern IT, work with resources, data and materials;
- apply entrepreneurial thinking, manage costs and calculations, and conduct themselves responsibly and in a socially-oriented manner in the working environment.

Optional:

- repair jewellery with gems set in;
- mark products and determine the purity of the precious metal alloy.
- fabricate one-off jewellery using old art and craft techniques;
- set decorative stones into jewellery using the setting technique.
- fabricate jewellery using modern industrial processes.

In addition, the holder of the certificate also upgraded his/her key professional skills and competences with key general knowledge and skills in line with national standards.
